As a Self-taught Full Stack Developer, I try to leverage my experience in both front-end and back-end technologies to create web applications that address diverse needs. My journey has been marked by continuous learning and a commitment to improving my skills. With a passion for problem-solving, I try to make a positive impact by crafting software solutions that simplify tasks and enhance user experiences.

SKILLS

Typescript, NextJS, Material-UI, Styled-component, Tailwind, VueJS, Redux/Toolkit, JWT, Socket, Data-visualization, NodeJS, MongoDB, Design Patterns, NGINX, Postfix, Docker, Git, linux, Figma

PROJECTS

Currency Exchange (4 month) [User](), [Admin]() | [User code](), [Admin code](), [Server code]() | [Figma1]() , [Figma2]()

Users can convert a fixed amount between different currencies. The application utilize predetermined exchange rates to deliver accurate conversion results.

- Created a user friendly interface using NextJS for the user side and ReactJS for the admin side
- Implemented real-time chat functionality
- Implemented Google login authentication
- Set up a postfix mail server for effective user communication
- Integrated third-party payment gateways for seamless transactions

Technologies: Nextjs, ReactJs, Typescript, Materia-UI, JWT, Socket, Redux, MongoDB, NodeJS, Postfix, Ngnix

Diagnostic Lab Management System (2 month) [Demo]() | [Live]() | [Client code]() , [Server code]() | [Figma]()

A system that handles sample tracking, test management, result reporting and invoicing. This system enhances lab efficiency, patient care and financial management.

- Developled role-based system customization
- Optimized data viewing with infinity scroll
- Implemented staff log tracking for monitoring
- Implemented a referral program, allowing staff to earn commission through successful referrals

Technologies: ReactJs, JWT, Styled-component, Redux, MongoDB, NodeJS, Ngnix

LeaderBoard Generator (1 month) [Demo]() | [Live]() | [Code]()

A system that allows users to manage PUBG sports points and generate customized leaderboards.

- User can manage points
- User can download leaderboard and various cards
- Implemented Notification for new designs without using server side

Technologies: ReactJs, JWT, Styled-component, Redux, MongoDB, NodeJS

EDUCATION

HSC (2015-16) | **Diploma in Computer** (2016 - 7 Sem)
